EXPERIENCE

PRODUCT MANAGER INTERN | Vidyard
Sep 2017 – Dec 2017 | Kitchener, Canada
- Worked with engineers to remodel notification architecture and reduced the time required to send a system notification by over 50%
- Used HEAP, Persicope and other data analysis tools to analyze trends and provide upper management with reports and insights
- Conducted market research and interviewed customers to build a roadmap of new features to be developed, and created multiple product briefs

SOFTWARE ENGINEER INTERN | Atrio
Jan 2016 – Apr 2016 | Bloomfield Hills, USA
- Created a CRM plugin that auto-suggests addresses based on user input and is currently being used by over 300 users across 10 companies. Built with JavaScript and Bing Maps REST API.
- Created a console application with C# that allows users to login to their CRM platform and mass import files into it.
- Worked alongside a senior manager to provide software consulting services to clients.

TECHNICAL ANALYST INTERN | RBC Royal Bank
May 2015 – Aug 2015 | Toronto, Canada
- Reduced processing time by over 30% for a wholesale banking tool
- Created extensive technical documentation
- Manipulated large databases using SQL

AWARDS & PROJECTS

ATTENTION SEEKER Honourable Mention at Hack The 6ix
August 2017 - Present
- Instagram Tool that analyzes a user and his/her followers' activity to determine the best time to post a picture and receive the most likes. Built with Python, Kivy and the Instagram API.

HACKHARASSMENT 1ST PLACE Queen's University Hackathon
Feb 2017
- Created Blok.it, a profanity censoring chrome extension that won MLH's #HackHarassment award. Built with HTML, CSS and JavaScript.

UX & DESIGN CONSULTANT TEAM LEAD Laurier Consulting
Jan 2017 - Present
- Provided design and user experience consulting for a Waterloo startup, and increased their user retention rates by approx. 20%.

DESNAP Decode 2017 - Google Delegate
March 2017
- Worked alongside a team of students and Google Engineers to create a Snapchat-like Android app that allows users to send each other disappearing pictures. Made with Java in Android Studio with a Firebase back-end.
